## PROFESSIONAL SUMMARY

Full Stack Developer with 3 years of experience designing and delivering scalable, secure enterprise applications using Java 8, Java 11, Java 17, Spring Boot, and Angular/React.js. Contributes to architecture, design patterns, coding standards, and component-based state management with a focus on UI performance and reliability. Skilled in translating requirements and specifications into technical solutions, troubleshooting production issues through root-cause analysis, and collaborating with cross-functional teams on sprint planning, estimation, and Agile/Scrum delivery. Strong problem solving and logical thinking skills, backed by automated unit, integration, and UI testing, validation, and test cases for production-grade systems serving 500+ users.

## TECHNICAL SKILLS

**Languages:** Java 8, Java 11, Java 17, JavaScript (ES6+), TypeScript, SQL

**Backend:** Spring Boot, Spring MVC, Spring Data JPA, Hibernate/JPA, RESTful APIs, Microservices, API Versioning, Node.js, JUnit, Maven

**Frontend:** Angular, React.js, Redux, Next.js, Component Design, State Management, Routing, HTML5, CSS3

**Database & Cloud:** MySQL, PostgreSQL, Oracle, AWS (S3, EC2, IAM, CloudWatch), Docker, Containerization, Git, CI/CD

**Security:** JWT, OAuth, Role-Based Access Control (RBAC)

**Practices:** Agile/Scrum, Sprint Planning, Sprint Estimation, Scalability, Design Patterns

## PROFESSIONAL EXPERIENCE

### Software Engineer — Techbird IT Services Pvt. Ltd.

Oct 2023 – Present

- Developed a Digital Banking, Payments & Credit Management Platform and Document Management applications using React.js, Angular, Java, Spring Boot, Spring MVC, and RESTful APIs, supporting 500+ end users.
- Designed 20+ reusable UI components with structured state management and routing, and integrated 15+ REST API endpoints, improving UI performance by up to 25% and cutting frontend development time by ~30%.
- Optimized performance via refactoring, lazy loading, and containerization, improving page load speed by up to 35% while reducing post-release defects by ~20% through code reviews and automated testing.

### Full Stack Developer Intern — PrepForTech

Apr 2022 – Apr 2023

- Gathered requirements and specifications, built and validated REST API endpoints with React.js front-end components, and wrote test cases to reinforce SDLC practices.
- Contributed to sprint estimation and Agile/Scrum ceremonies, and practiced Git version control under mentor guidance; earned Full Stack Developer Internship certification.

### Freelance Full Stack Developer — Self-Employed

Aug 2021 – Mar 2022

- Designed and deployed a full-stack Inventory & Billing Management System (React.js, Spring Boot, MySQL) on AWS EC2 for a small-business client.
- Implemented JWT-based role authentication and access control, and built responsive dashboards for real-time inventory tracking and reporting.

## KEY PROJECTS

### Document Management System (DMS)

React.js, Angular, Java, Spring Boot, MySQL, AWS S3/EC2/IAM, CloudWatch

- Built a centralized DMS for upload, storage, retrieval, and version control of 1,000+ enterprise documents using AWS S3 and IAM-based access control.
- Reduced average document retrieval time by ~40% and improved upload/download performance by ~25% via optimized REST API integration.

### Real-Time AI Audio Streaming App (Personal Project)

Node.js, WebSockets, React.js, Groq API (Whisper-Large), TypeScript

- Engineered a low-latency WebSocket pipeline to stream system/microphone audio to transcription engines with sub-second rendering latency.

## EDUCATION

Bachelor of Engineering — Vidarbha Institute of Technology, Nagpur | CGPA: 8.71 | 2021

## CERTIFICATIONS

Full Stack Developer Internship – PrepForTech (2022–2023) | Credential: [credential.net/5945b5e5...](https://credential.net/5945b5e5...)
